

ICS 321 Fall 2009

# Project Presentation Template

Team Name

Team Members

# Background

- Tell us about the application scenario
- How DBMS can help
- Basically setup the “problem” that your project addresses

# Overview of Your Project

- Tell us about how your team use DBMS in the application scenario described previously
- Could use a diagram to illustrate your solution
- What are some of the cool features

# Demo

- Don't demo every feature
- Pick just a couple of cool things to demo

# Challenges/Design Alternatives

- Describe some of the challenges or design alternatives

# Methodology

- How did you evaluate the different alternatives ?
- What data?
- What metrics ?
- What experiments ?

# Evaluation Results

- Use tables or graphs to illustrate the results of your evaluation
- Highlight interesting points in your results

# Conclusion

- Summarize
- Make a conclusion and recommendation (re: alternatives) based on your experimental evaluation.
